

WORKSHEET 7 – FUTURE WATER QUALITY PROJECTS

Date(s) Updated: _____

List all future potential water quality concerns on the ranch/farm with the expected pollutants from each. **A concern does not indicate that livestock grazing or current management caused it.** This includes locations where your current maintenance prevents problems such as maintaining ranch roads following winter storms. Consider multiple options for fixing water quality concerns such as implementing new practices, and changing management or maintenance routines. Estimate the approximate cost of each option as well as the amount of time needed to conduct maintenance. Give each project a priority, relative to other potential projects, indicating preferred order implementing the project. Assignment of priority recognizes that the availability of financial and technical assistance determines when work is done. List the steps taken to plan for the project including participation in technical & financial assistance programs (ranch visits, meetings, applications, expected contract dates, etc). Use additional sheets if needed.

FUTURE WATER QUALITY CONCERN

#	Describe concern	Location pasture/field	Options for maintenance, management changes, or practice(s) to implement	Estimate cost of each option	Priority	Implementation planning
